adding life and value to your property

Epoxy Floorings & Coatings

**UNIVERSAL
SHADE CARD**

EPOXY CRACK FILLERS

A comprehensive range of high-performance epoxy crack fillers engineered for concrete substrates, with compatibility across various structural and non-structural applications.

EPOXY PRIMERS

A diverse range of epoxy primers formulated for optimal adhesion on most substrates—specially engineered for concrete and metal surfaces—with excellent corrosion resistance, chemical durability, and moisture tolerance.

EPOXY MID COATS

Designed to increase the thickness of epoxy flooring systems using solvent-free pure epoxy resins combined with epoxy-compatible fillers. These intermediate layers enhance compressive strength and overall mechanical performance, making them ideal for industrial floors, heavy-duty traffic zones, and areas subject to high mechanical loads.

CEMENTITIOUS SCREEDS & REPAIR MATERIALS

Designed for levelling surfaces, fix defects, and enhance substrate strength—ensuring optimal bonding, durability, and performance of epoxy flooring systems in demanding environments.

TWO COMPONENT EPOXY TOP COATS

High-performance two-component epoxy top coats offering excellent chemical resistance, durability, and gloss—ideal for industrial floors, warehouses, and heavy-duty environments.

THREE COMPONENT HEAVY DUTY EPOXY FLOORINGS

Robust three-component epoxy flooring systems engineered for heavy-duty performance with superior strength, chemical resistance, and aesthetic appeal—ideal for factories, warehouses, and high-traffic industrial environments.

THIN COAT BRUSH, ROLLER & SPRAY APPLIED

Thin coat epoxy coatings designed for brush, roller, or spray application—delivering excellent adhesion, chemical resistance, and durable protection for concrete, metal, and other surfaces in industrial, commercial, and utility environments.

METAL PRIMERS & COATINGS

Thin-coat epoxy coatings designed for brush, roller, or spray application—delivering excellent adhesion, chemical resistance, and durable protection for concrete, metal, and other surfaces in industrial, commercial, and utility environments.

EPOXY PUTTY

High performance epoxy putty solutions designed for strong bonding, surface repairs, crack filling, and industrial grade durability.

Aesthetica Series

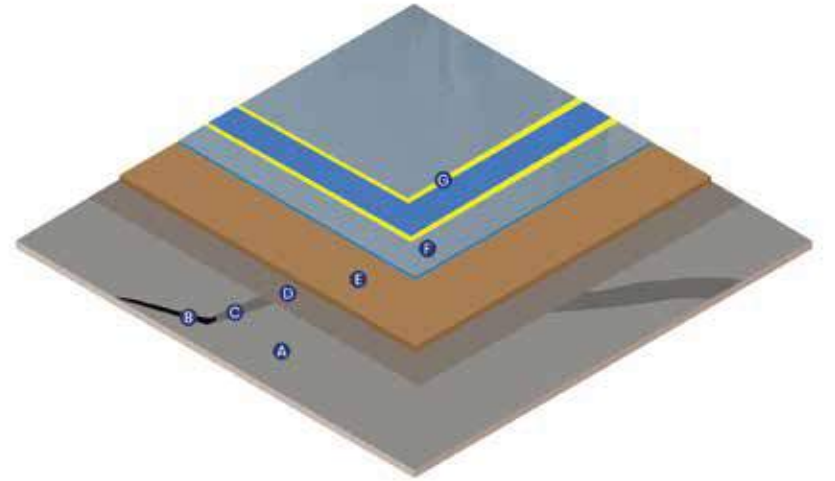

HEAVY DUTY APPLICATION

Industrial Warehouse with Heavy Forklift Traffic
Cold Storage and Freezers Rooms
Chemical Processing and Refineries
Breweries, Beverages and Dairy Industries
Powerplants and Utility Areas
Engineering Fabrication Workshops and Heavy
Manufacturing Plants

SPECIALIZED APPLICATIONS

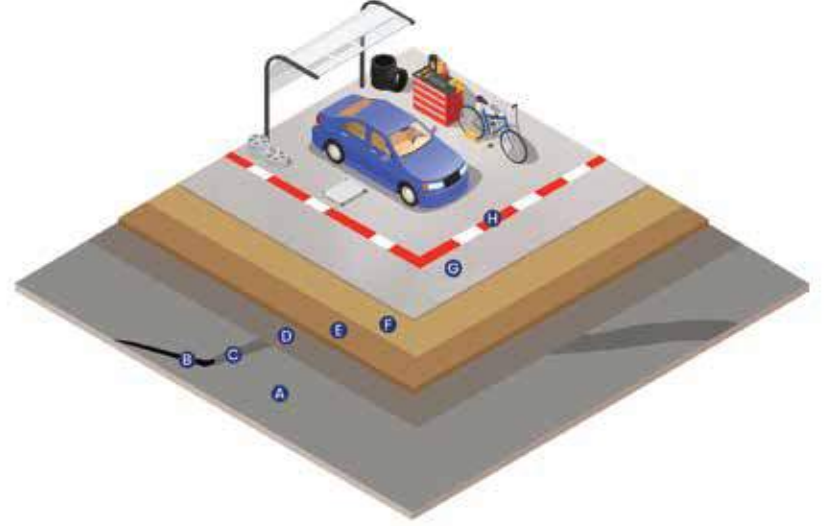

Static Dissipative - Anti Static Applications
ESD - Controlled Cleanroom Environments
High Moisture Substrates Epoxy Moisture
Barrier System

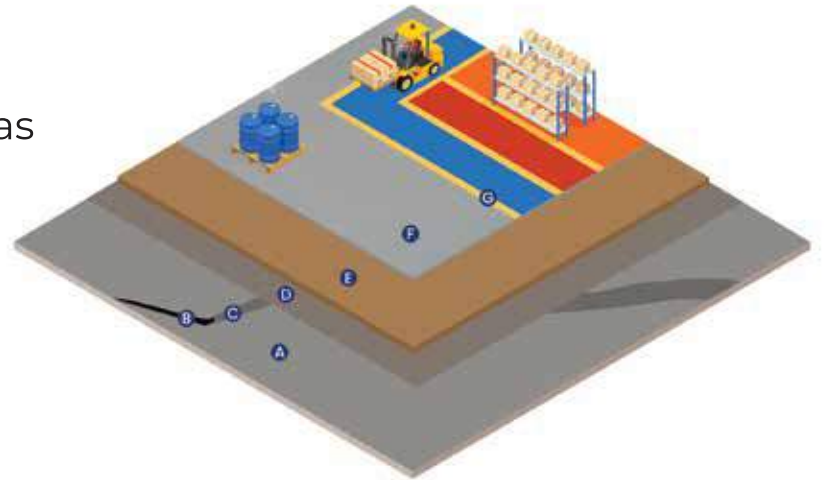

LIGHT DUTY APPLICATION

Residential Garages and Basements
Retail Shops and Showrooms
Offices and Administrative areas
Cafeterias, Canteen & Dry Storage areas
Laboratories with Light Chemical use
Hospital & Clinical (Non-critical areas)
Schools & Educational Facilities (Classrooms, Libraries)

MEDIUM DUTY APPLICATION

Warehouse and Logistics Centers
Automobile service workshops
Commercial Kitchens and Food preparation areas
Hospital and Pharmaceuticals Floors
Electronic Assembly areas
Light Manufacturing Plant
Supermarkets and Hypermarkets
Parking areas with Moderate to Light Vehicles Loads.

Areas of Application of Epoxy Floor Coatings

There are several areas where epoxy floorings can successfully be applied.
They include but certainly not limited to the following:

Chemical plants

Pharmaceuticals Industries

Food Processing Areas

Bottling Plants

Electric / Electronics Industries

Computer Rooms

Hospitals Operation Theaters & Corridors

Nuclear Power Plants

Dairies

Laboratories

Aerospace Industries

Airport Hangers

Automobiles Workshops

Textile Mills

Warehouses

Hotels & Restaurants
